Good afternoon Crystal Beeler,

Thank you for reaching out to the Kentucky Board of Cosmetology. Fortunately, PSI provides the most up to date testing information available on the Candidate Bulletin for each type of examination at <https://test-takers.psiexams.com/kycos/test>. On page 11 of the candidate bulletin for the KY Nail Technician examination, under the Manicurist Theory Content Outline section IV, it does state the use of Gels (oligomer) monomer and polymer. We highly recommend reviewing the candidate bulletin.

**Subject:** PSI testing

---

I am seeking clarity whether or not the nail students are allowed to use poly-gel/hybrid gel in place of the odorless system? If the student can supply a cordless lamp to cure the polymer. I know this has been talked about at PSI sessions, but I'm unclear if Kentucky State Board has approved this.

Thank you for your time.
